EDUCATION

Institute of Business Administration (IBA) Karachi *Aug 2023 – Jun 2027*

BS Computer Science | CGPA: 3.45 | Dean's List – 3 consecutive semesters

Nixor College *Aug 2021 – Jun 2023*

A Levels | 3As, 1B | Pursuit of Excellence Award, Dean's List, 18% Academic Scholarship

PROJECTS

Shipment Management B2B SaaS Platform | Live in UAE & KSA

Next.js 16, React 19, Supabase, Prisma 7, PostgreSQL

- Replaced manual iMile booking and spreadsheet invoicing for ~50 shippers, scaling to daily peak volumes of 2,000 and 3,000 shipments per market.
- Automated cost-plus billing engine, PDF invoice generation, and COD settlement tracking, removing manual invoicing entirely.
- Created bulk upload supporting 500 shipments/batch, webhook status tracking, and waybill printing.

WePay – Expense Sharing Application | GitHub

PostgreSQL, Node.js, Express, React Native, Expo | Database Systems Project

- Designed an 8-entity schema and wrote all DDL statements, implementing 16 stored procedures to automate balance updates and settlements.

Pacman AI | GitHub

Python

- Built autonomous Pacman controllers using PSO and Evolutionary Algorithms, outperforming rule-based baselines by applying population-based optimization in decision-making.

WORK EXPERIENCE

Providus Technologies – Associate Product Engineer *Jun 2026 – Present*

- Built ReconAI end-to-end in Next.js, piping DocAI-parsed documents into an LLM reconciliation engine with an evidence viewer and auto-drafted supplier emails.
- Audited 53 procurement documents to measure DocAI's parsing accuracy, identifying failure patterns that fed directly into product fixes.
- Designed the agentic procure-to-pay (P2P) cycle covering vendor selection, purchase order creation, and document reconciliation.
- Conducted competitive analysis of document intelligence market, identifying new workflow ideas that shaped the product roadmap.

10Pearls – Data Science Intern (Shine Program) *Apr 2026 – Jun 2026*

- Developed a serverless AQI prediction system using Random Forest and XGBoost models, scheduling hourly and daily data pipelines to deliver 72-hour forecasts.
- Optimized database query performance by implementing timestamp filters on the feature group, reducing data pipeline latency from over 100 seconds to under a second.

IBA Karachi – Data Structures Teaching Assistant *Aug 2025 – Dec 2025*

- Ran weekly lab sessions and office hours for ~30 students, graded quizzes and submissions to improve performance throughout the semester.

Headstarter – Software Engineering Fellow *Aug 2024 – Sep 2024*

- Shipped 2 AI products – Storage Organizer and Studyfy AI (YouTube video summarization via OpenAI transcription API) – both live on Vercel within a 2-month accelerator.

EXTRACURRICULAR ACTIVITIES

- **AIESEC in IBA | Oct 2023 – Aug 2025:** Recruited new members by conducting panel interviews and group discussions, evaluating candidates on cultural fit and values alignment.
- **26th HEC Men's Shooting Championship – Air Rifleman | Nov 2024 – Jan 2025:** Competed nationally, qualifying and representing IBA Karachi in a high-pressure individual discipline.
- **Out-of-thin-Air Game Jam – Team Captain | Sep 2023:** Led 3-member team to design and ship original game 'Pinpoint'.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, SQL

Frameworks: Next.js, React, React Native, Expo, Node.js, Express, Prisma

Tools: Supabase, PostgreSQL, Git, Power BI, Microsoft Excel, GitHub Actions, Claude Code, GitHub Copilot, Hermes Agent
